REVISION

# The whole subject in one pass

The demo subject in one pass.

## Money and Time

### Present Value: What a Future Rupee Is Worth Today

**Present value** shrinks a future cash flow by the return you could have earned meanwhile.

- PV = C/(1+r)^t
- rate = opportunity cost

$$\mathrm{PV} = \frac{C_t}{(1+r)^t}$$

✕ Using the wrong period rate (annual rate with monthly periods).
✕ Adding cash flows from different dates without discounting.

## People at Work

### Conflict: When Disagreement Helps

A **moderate** level of task conflict keeps a team sharp; **too little or too much** hurts.

- Moderate task conflict is functional.
- Fix structure before people.

**FUNCTIONAL**

- supports group goals
- task-focused

VS

**DYSFUNCTIONAL**

- hinders performance
- personal

✕ Stopping at 'cultural differences'.

Copy by hand.

## SIDE 1

**PV**

$$PV = C/(1+r)^t$$

rate = opportunity cost
